- Envelopes (outer and inner) are calligraphed in black ink or color. Both envelopes must offer a degree of transparency; envelopes are calligraphed using a lightbox. If you are ordering envelopes with a lining, please check that the lining of the inner and/or outer envelope is not opaque.
  - The basic format used is staggered (indented). Envelopes must be at the very least 7" wide.
  - The envelope surface needs to permit a gliding of the copperplate nib across the surface. It is a sharp pointed nib and will not glide upon highly textured paper.
  - If your envelope is created from recycled paper, there may be an additional cost of \$50.00 to the final price. Recycled papers often have tiny hairs or are super absorbent. Your envelopes would need a spray fixative applied. This is an occupational hazard and also involves more time in envelope preparation.
  - Price for the outer envelope is \$1.50 and \$.50 for the inner envelope. An additional final \$50 if fixative applied.
